Product Strategy ~ User-Centered Design
Cross-Functional Collaboration ~ Data Analytics
Market & User Research ~ Roadmap Planning
Agile Development ~ Spec Driven Development
Technical Fluency ~ Stakeholder Management

Aspiring Product Manager | Computer Science & Economics (2028)

Product-minded Computer Science & Economics student with internships spanning consumer lending, capital markets, and software engineering. Combines AI and technical fluency with financial and analytical grounding to translate ambiguous problems into structured, data-backed solutions. Delivered a live AI-powered product metrics dashboard and authored the scope and API requirements for a lead-selling webhook integration at a $10M+ consumer lending FinTech. Built predictive models and investor reporting for loan pools meeting Fitch/KBRA criteria and collaborated with engineers on backend, API, and database work—bridging technical delivery, analytics, and stakeholder-facing product decisions.

KEY QUALIFICATIONS & SKILLS

- ✓ Built and shipped a live, agentic AI-powered dashboard tracking core product metrics — scope creep, kill rate, feature adoption rate, and epic ROI — for a $10M+ consumer lending FinTech.
- ✓ Authored the scope of work for a webhook integration with a third-party lead-selling platform projected to 3x revenue, and benchmarked competitors' organic traffic acquisition strategies via a GEMBA walk.
- ✓ Built predictive models to identify loan pools meeting Fitch and KBRA ratings criteria, turning complex financial data into investor- and bank-ready reporting.
- ✓ Partnered with engineers to design and ship two new features — via API design, backend development, and database management — for a Mach 5 aircraft's user interface.
- ✓ Co-led a 20+ person organizing team across logistics, marketing, and sponsorship to plan and execute a 500+ participant hackathon.
- ✓ Led outreach, social media, and budget planning for a 100+ member student organization, coordinating with campus and departmental stakeholders.

EXPERIENCE

Student IT Apprentice | UNC Kenan-Flagler Business School, Chapel Hill, NC **September 2026 – Present**

UNC-Chapel Hill's Business School

- Provide front-line technical support to students, faculty, and staff, troubleshooting computer-related issues through walk-in assistance, phone calls, and email.
- Image and configure laptops, maintain loaner device inventory, and support hardware deployments, office moves, and workstation setups.

Product Management Intern | HIVE Financial Systems, Atlanta, GA **May 2026 – July 2026**

$120M+ FinTech specializing in consumer lending

- Collaborated with Underwriting, Payments, and Lead Generation product and QA engineering teams in Scrum and Kanban environments, building a live, agentic Claude skills-powered dashboard that automated tracking of core product metrics— including scope creep, kill rate, feature adoption, and Epic ROI—to establish baselines for feature effectiveness and roadmap prioritization.

- Authored the scope of work and technical requirements for a webhook integration with Tekambi Agora (third party lead-selling platform), defining API contracts and implementation requirements for engineering handoff; integration projected to materially increase lead revenue.
- Completed a GEMBA walk of competing lead-purchasing providers to benchmark acquisition strategies and synthesized findings into recommendations for lead decisioning and go-to-market approaches.

Capital Markets & Data Analytics Intern | GreenSky, Atlanta, GA **May 2025 – July 2025**

$2B+ FinTech specializing in home improvement lending

- Built predictive models and tools to identify loan pools that met Fitch and KBRA criteria; prepared data tapes, stratified samples, and automated investor- and bank-ready reporting to streamline securitization workflows.
- Facilitated ABS securitization and transaction execution and supported a new credit facility deal alongside Goldman Sachs, RBC, Mizuho, and Citi to finance future securitized loans.

Software Engineering Intern | Hermeus Corporation, Atlanta, GA **July 2024**

Aerospace and defense startup with $300M+ in Series C funding

- Assisted in building the Java-based user interface for maneuvering a commercial hypersonic aircraft designed to fly at Mach 5.
- Collaborated with management and software engineers to implement two new features via database management, API design and development, and backend software work, contributing to production-ready releases.

LEADERSHIP & COMMUNITY INVOLVEMENT

Co-President and Project Team | UNC CS + Social Good, Chapel Hill, NC **September 2025 – Present**

- Lead outreach, external relations, social media, and budget planning in coordination with campus and departmental stakeholders, organizing events and workshops for 100+ members.
- Develop interactive educational platforms for UNC departments, including the Parr Center and Pauli Murray Center, using Claude Code, React, TypeScript, Firebase (Firestore, Storage), and Node.js.

Co-Lead Director (President) | HackNC, Chapel Hill, NC **March 2025 – Present**

- Lead a 20+ member organizing team across logistics, marketing, and sponsorship to plan and execute HackNC, UNC's flagship 500+ participant hackathon.
- Drive sponsor outreach and budget strategy, securing over $30k through corporate partnerships and university funding to support venue, prizes, and overall participant experience.

Mentor | Apollo Aspire **August 2024 – Present**

- Coach low-income students through the college application process, including essay editing, financial aid guidance, and application submission.

Founder | Coded for Africa, Nairobi, Kenya **August 2020 – Present**

- Built a program to help 200+ students develop their interest in technology to improve their future quality of life.
- Partnered with IBM to develop Cloud Certification programs for upper-middle and high school students at Jaffery Academy in Nairobi and Aga Khan Education Services of Kenya (codedforafrica.com).

EDUCATION

B.A. Computer Science & Economics; Minor in Public Policy | University of North Carolina at Chapel Hill, Chapel Hill, NC **May 2028**

Relevant Coursework: Data Structures, Computer Organization, Data Science & AI in the Business World, Microeconomics

TECHNICAL SKILLS

Python, Java, C, TypeScript, SQL, ReactJS, Firebase, Node.js
Git, Excel, Tableau, HTML/CSS, Snowflake, Linux, JavaFX, MATLAB, R, Atlassian (Jira, Rovo), Agentic AI, Claude(Code & Cowork), Open AI/Codex, API, Langchain, Hugging Face, Prompt Engineering, Lovable

CERTIFICATIONS

Developing AI Applications
AWS Academy Cloud Foundations Certification
IBM Cloud Core Badge
Cloud Essentials Certification
