Statistical Modeling ~ Predictive Analytics
SQL & Python ~ Data Visualization
Financial & Regression Analysis ~ Reporting Automation
Data Cleaning & QA ~ Dashboard Development
Tableau ~ Snowflake ~ Excel Modeling

Aspiring Data Analyst | Computer Science & Economics (2028)

Computer Science and Economics student with three internships spanning product development, capital markets, and software engineering at FinTech and aerospace companies. Built predictive models to identify loan pools meeting Fitch and KBRA ratings criteria, prepared data tapes and stratified samples, and automated investor and bank reporting at a \$2B+ FinTech. Built a live, AI-powered dashboard that automatically calculates and tracks core product metrics. Proficient in Python, SQL, R, MATLAB, Excel, and Tableau, with coursework in data structures, computer organization, and data science in the business world. Proven leader of large cross-functional teams: co-led a 20-person committee that runs UNC's 500+ participant hackathon and drives outreach for a 100+ member campus organization. Seeking a Data Analytics internship to bring hands-on modeling, reporting automation, and data storytelling experience to a data team.

KEY QUALIFICATIONS & SKILLS

```
graph TD; DC[Data Collection] --> CQA[Cleaning & QA]; CQA --> M[Modeling]; M --> V[Visualization]; V --> IR[Insights & Reporting]; IR --> DC;
```

- ✓ Built predictive models and tools to identify loan pools meeting Fitch and KBRA criteria; prepared data tapes and stratified samples for a \$2B+ FinTech's investor and bank reporting.
- ✓ Automated investor and bank reporting workflows, reducing manual data preparation and improving reporting accuracy and turnaround.
- ✓ Built and shipped a live, agentic AI-powered dashboard to automatically calculate and track core product metrics — scope creep, kill rate, feature adoption rate, and epic ROI.
- ✓ Completed a GEMBA walk of competing providers to benchmark organic traffic acquisition strategies, translating qualitative observation into structured comparative analysis.
- ✓ Worked with engineers on database management and backend development to support two new features for a Mach 5 aircraft's user interface.
- ✓ Co-led a 20+ person organizing team and managed budget planning for a 500+ participant hackathon and a 100+ member student organization.

EXPERIENCE

Product Management Intern HIVE Financial Systems, Atlanta, GA	May 2026 – Aug. 2026
<i>\$10M+ FinTech specializing in consumer lending</i>	
- Built a live, agentic AI-powered dashboard to automatically calculate and track core product metrics — scope creep, kill rate, feature adoption rate, and epic ROI (hivefs.com). - Authored the scope of work for a webhook integration with Tekambi Agora, a third-party lead-selling platform, projected to 3x revenue. - Completed a GEMBA walk of competing lead-purchasing providers, collecting and structuring comparative data to benchmark organic traffic acquisition strategies.	
Data Analytics & Capital Markets Intern GreenSky, Atlanta, GA	May 2025 – Aug. 2025
<i>\$2B+ FinTech specializing in home improvement lending</i>	
Built predictive models and tools to identify loan pools meeting Fitch and KBRA criteria; prepared data tapes and stratified samples used in investor and bank reporting.	

- Automated investor and bank reporting processes, streamlining recurring data preparation for Asset-Backed Securities (ABS) transactions.
- Supported ABS securitization, transaction execution, and a new credit facility deal alongside Goldman Sachs, RBC, Mizuho, and Citi, drawing on loan-level data to inform deal structuring (greensky.com).

Software Engineering Intern | Hermeus Corporation, Atlanta, GA

July 2024

Aerospace and defense startup with \$300M+ in Series C funding

- Assisted in building the user interface, in Java, for maneuvering a commercial hypersonic aircraft designed to fly five times the speed of sound (Mach 5).
- Worked with management and software engineers to implement two new features through database management, API design and development, and backend software development (hermeus.com).

LEADERSHIP & COMMUNITY INVOLVEMENT

VP of Outreach and Project Team | UNC CS + Social Good, Chapel Hill, NC

Sept. 2025 – Present

- Lead outreach, external relations, social media, and budget planning in coordination with campus and departmental stakeholders, organizing events and workshops for 100+ members.
- Develop interactive educational platforms for UNC departments, including the Parr Center and Pauli Murray, using React, TypeScript, Firebase (Firestore, Storage), and Node.js.

Co-Lead (President) | HackNC, Chapel Hill, NC

March 2025 – Present

- Lead a 20+ member organizing team across logistics, marketing, and sponsorship to plan and execute HackNC, UNC's flagship 500+ participant hackathon.
- Drive sponsor outreach and budget strategy, securing corporate partnerships and university funding to support venue, prizes, and overall participant experience.

Mentor & Youth Team Leader | Aga Khan Development Network (AKDN), Duluth, GA

Aug. 2020 – Present

- Coach low-income students through the college application process, including essay editing, financial aid guidance, and application submission.
- Led 100+ volunteers ages 8–18 to organize youth activities and manage events serving 5,000 people every weekend.

Founder | Coded for Africa, Nairobi, Kenya

Aug. 2020 – Present

- Built a program to help 200+ students develop their interest in technology to improve their future quality of life.
- Partnered with IBM to develop Cloud Certification programs for upper-middle and high school students at Jaffery Academy in Nairobi and Aga Khan Education Services of Kenya (codedforafrica.com).

EDUCATION

B.A. Computer Science & Economics; Minor in Public Policy | University of North Carolina at Chapel Hill, Chapel Hill, NC

May 2028

Relevant Coursework: Data Structures, Computer Organization, Data Science in the Business World, Microeconomics

TECHNICAL SKILLS	CERTIFICATIONS
Python, SQL, R, MATLAB, Excel, Tableau, Snowflake	AWS Academy Cloud Foundations Certification
Java, C, TypeScript, ReactJS, Firebase, Node.js	IBM Cloud Core Badge
Git, HTML/CSS, Linux, JavaFX, Atlassian (Jira), Agentic AI	Cloud Essentials Certification
